ALI HAIDAR

Data & AI Engineer | Mobile & Full-Stack Developer

DHA, Lahore, Pakistan | +92 307 0705205 | mraleeyrajput@gmail.com | LinkedIn: ali-haidar | GitHub: mraleey

WORK EXPERIENCE

Data & AI Engineer | LUMS Energy Institute / enfo.ai | Lahore, Pakistan | July 2025 – Present

- Developed and deployed cross-platform Flutter mobile applications for energy monitoring, smart meters, EV charging, and battery systems to the Google Play Store and Apple App Store.
- Built real-time analytics dashboards using React.js, TypeScript, and JavaScript with Python backends for telemetry visualization, monitoring, anomaly detection, and AI-powered reporting.
- Designed and implemented high-throughput asynchronous backend services with FastAPI, PostgreSQL (time-series), Redis, REST APIs, WebSockets, and MQTT, including ETL/ELT pipelines for IoT data ingestion and processing.
- Managed Linux VPS infrastructure, started projects from scratch, and handled end-to-end production deployment, configuration, and releases using Git, GitHub, and CI/CD pipelines for scalable big data workloads.
- Built production Agentic AI workflows, multi-agent systems, RAG pipelines, LLM-based chatbots, and time-series forecasting models with anomaly detection on solar and telemetry data for natural language queries and automated reporting.

Mobile Application and Full Stack Developer | Solution Experts | Lahore, Pakistan | Sept 2023 – Dec 2025

- Designed, developed, and deployed cross-platform Flutter and React Native mobile applications to the Google Play Store and Apple App Store with Firebase Authentication, Cloud Firestore, and local data caching.
- Built and maintained PHP-based web applications, dynamic websites, and ERP/CRM systems using MySQL, RESTful APIs, and responsive frontend development.
- Integrated Firebase Cloud Messaging (FCM) for push notifications and implemented JazzCash and EasyPaisa payment gateway integrations for mobile and web transactions.
- Integrated Google Cloud Platform services, including Google Calendar API for automated scheduling and live location management with GPS-based tracking and geofencing.
- Managed Git/GitHub repositories, branching strategies, CI/CD pipelines, and end-to-end production releases across web and mobile platforms.

TECHNICAL SKILLS

- **AI & Generative AI:** Agentic AI, Multi-Agent Systems, LLMs, LangGraph, LangChain, RAG Pipelines, Prompt Engineering, Time-Series Forecasting (ARIMA/SARIMA, LSTM, Prophet), Anomaly Detection
- **Backend & Data Engineering:** Python, FastAPI, PHP, Asynchronous Programming, RESTful APIs, WebSockets, MQTT, ETL/ELT Pipelines, Real-Time Data Processing, Big Data Handling, PostgreSQL (Time-Series), Redis, MySQL
- **Frontend & Mobile:** React.js, TypeScript, JavaScript, Flutter, React Native, Dart, State Management (GetX), Responsive UI, Cross-Platform Development
- **Cloud, DevOps & Integrations:** Linux, Docker, Git, GitHub Actions, CI/CD, VPS Deployment, Firebase, GCP, Google Calendar API, JazzCash, EasyPaisa, App Store & Play Store Publishing

EDUCATION

BS in **Computer Science** (Specialization in **Data Science**) | **University of Gujrat** | 2019 – 2023
